

Charley's Café Credit Card Charges

NAME:

Suppose Charley's Café had the following credit card charges and refunds yesterday.

Charges	Refunds
\$45.36	\$11.09
\$52.31	\$5.12
\$11.09	
\$15.34	
\$8.57	

1. What is the total amount charged yesterday?
2. What is the total amount refunded yesterday?
3. Find the credit card sales less refunds.
4. If the credit card company charges a 3% fee, how much will Charley have to pay for this fee?
5. Find the amount of credit given to Charley's Café after the fee is subtracted.
6. If every customer paid by a debit card instead of credit, and the bank charges \$0.21 per swipe, how much would the fee be then? (Include the refunds as swipes too.)
