PairDoThis: Factoring trinomials   NAME:

NAME OF PARTNER:

On the <u>back</u> <u>side</u> of this paper, make up a trinomial for your partner to factor. The most reliable way to do this is to make up a FOIL problem like $(x+2)(x+5)$ and then multiply it out and simplify. Do this work on the **back side** of this paper.

Then write your trinomial on the <u>front</u> <u>side</u> of this paper and exchange papers with a partner. Your partner and you will then factor each other's trinomial. Your partner should do any writing on the front side of the paper, turning the paper over only to check.
